

AUN ABBAS

AI & GenAI Engineer | RAG & LLM Systems | Python Backend Developer

07aunabbas@gmail.com • +91 9945948706 • Bangalore, India • LinkedIn: [linkedin.com/in/aunabbas07](https://www.linkedin.com/in/aunabbas07) • GitHub: github.com/aunabbas007 • Portfolio: aunabbas07.netlify.app

PROFESSIONAL SUMMARY

AI Engineer specializing in Generative AI and Large Language Model (LLM) systems, with production experience building Retrieval-Augmented Generation (RAG) pipelines, vector search, and backend services. Hands-on with Azure OpenAI, FastAPI, PostgreSQL/pgvector, LangChain-style prompt orchestration, and embedding-based semantic search, alongside a strong foundation in classical ML (Scikit-learn, TensorFlow, PyTorch) for classification, regression, and feature engineering. Proven track record delivering scalable, real-world AI applications through full-time industry experience, independent GenAI projects, and startup leadership.

TECHNICAL SKILLS

Programming: Python, Java, SQL

GenAI & LLM Engineering: RAG Pipelines, LLM Integration (Azure OpenAI, Groq), Prompt Engineering, Vector Embeddings, Semantic Search, Agentic Workflows

ML & AI: TensorFlow, PyTorch, Scikit-learn, Classification, Regression, Feature Engineering, Model Evaluation

Data & Analytics: Pandas, NumPy, Power BI, Tableau, Statistical Analysis, Data Visualization, EDA

Backend & DevOps: FastAPI, REST APIs, PostgreSQL, pgvector, Supabase, Docker, Kubernetes, ETL Pipelines, MySQL, Git, Jupyter Notebook

WORK EXPERIENCE

Syncortex – AI & Data Technology Co.

AI Engineer (Full-time)

Jun 2026 – Present

- Designed and deployed Retrieval-Augmented Generation (RAG) pipelines using Azure OpenAI, FastAPI, and PostgreSQL with pgvector, enabling semantic search and automated document intelligence for enterprise use cases.
- Built and maintained production LLM integration workflows, including prompt engineering, context retrieval, and vector embedding generation to power GenAI-driven backend features.

AI Engineer Intern

Sep 2025 – Jun 2026

- Developed Python-based backend services and REST APIs, reducing data retrieval latency by ~30% through optimised endpoint design.
- Automated ETL pipelines using Python, cutting manual data processing time by 40%.
- Built Power BI and Tableau dashboards tracking 10+ hospital KPIs, enabling data-driven decisions for senior stakeholders.
- Performed data preprocessing and analysis on 5,000+ patient records to extract 3 key actionable operational insights.

Unitech Labs

Co-Founder & Software Developer

Aug 2024 – Jun 2025

- Co-founded a tech startup; led a team of 4 to design and deploy 5+ client projects with 100% on-time delivery.
- Managed full SDLC across all projects — achieving 95%+ client satisfaction and zero critical post-deployment issues.

PROJECTS

Superior – RAG-Based Personal Cloud Storage Platform | [Next.js 15](#), [Supabase/pgvector](#), [Groq LLMs](#), [Voyage-3 Embeddings](#) |

github.com/aunabbas007/superior-cloud

- Built a production-style RAG pipeline combining Voyage-3 embeddings and pgvector for semantic search over unstructured documents.
- Implemented an LLM-powered query interface using Groq-hosted models with prompt engineering and optimized context retrieval.
- Designed a scalable backend architecture on Supabase for authentication, file storage, and vector database management.

Heart Disease Prediction | [Scikit-learn](#) | github.com/aunabbas007/heart-disease

- Trained Logistic Regression, SVM, and Random Forest classifiers with feature scaling and hyperparameter tuning; selected the best model using accuracy and confusion matrix analysis.

MNIST Digit Prediction | [Python](#), [PyTorch](#), [CNN](#) | github.com/aunabbas007/MNIST-digit-prediction

- Built a Convolutional Neural Network (CNN) in PyTorch for handwritten digit classification, applying convolutional layers, pooling, and dropout to improve generalisation accuracy.

House Price Prediction | [Scikit-learn](#) | github.com/aunabbas007/house-price-prediction

- Developed regression models with feature engineering and outlier handling; visualised feature correlations to improve prediction accuracy.

Titanic Survival Prediction | [Scikit-learn](#) | github.com/aunabbas007/titanic-survival-prediction

- Built classification models on the Kaggle dataset with feature encoding and cross-validation, comparing multiple ML algorithms to identify the best performer.

EDUCATION

B.Tech – Artificial Intelligence & Machine Learning | CMR University, Bangalore | 2022 – 2026

PUC (PCMC) | Jain University, Bangalore | 90% | KCET Qualified | ICSE Class 10 – 93% (Merit Rank)

CERTIFICATIONS

- Data Analytics Job Simulation – Deloitte / Forage (2025)
- Data Visualisation Job Simulation – Tata / Forage (2025)
- Data Science Job Simulation – British Airways / Forage (2025)
- Artificial Intelligence Fundamentals – Great Learning (2024)
- Python for Machine Learning – Great Learning (2023)

ADDITIONAL

Languages: English, Hindi, Urdu, Kannada (all professional proficiency)

Recognition: Awarded by Local MLA & Mosque Committee for academic excellence and community contribution (2022)
